The 2nd ABAV PhD and Young Acousticians day
University of Liege, 21 February 2014

ABAV, the Belgian Acoustical Society, organised its 2nd PhD day at the University of Liege. This manifestation was co-organised by our laboratory.

Twelve young acousticians (mainly doctoral and post-doctoral) coming from Belgian universities and societies have presented their research works to «less young» members of the ABAV. Among them were 3 researchers of our research unit Intelsig (Cédric André, Julien Osmalskyj and Thomas Schmitz).

More info can be found on the ABAV website: www.abav.be
