

INFO 0939: Some tips for the evaluation of the homeworks

Version: Oct 4 2011

Different elements are considered when the homeworks are evaluated. This *non-exhaustive* list is given for information and could be improved during the semester.

The objectives of the homework are achieved.

The C code is efficient, clear and clean.

- The source code compiles and the program executes without errors.
- The input/output of the program are *strictly* in accordance with the instructions.
- The elements of programming presented in the course are correctly used.
- The algorithms are implemented without any excessive complexity.
- There is not too much code duplication.
- The names of the variables and the functions are explicit.
- The source code is well commented and indented.
- For the parallel codes, the previous rules are followed whatever the number of processors.
- ...

The report is clear and clean.

- There are an introduction and a conclusion.
- The spelling is correct.
- The graphics (if any) are explicit (the scale is well chosen, the names of the axes are explicit, the legend is clear, ...).
- ...

The instructions of the homework are strictly followed.

- The number of pages of the report corresponds to what has been asked.
- The homework handed in time.
- ...
